

Imagine eons of history at your fingertips. Browse the contents of an atlas, learn about the 50 US states, study a database of world facts, or prepare for a US Citizenship test. The possibilities are endless with Palm™ handhelds in the social studies classroom.

Palm handheld computers are an excellent way to reduce students' back-pack load, while increasing the amount of data and information they can access. With optional SD Cards, you can store huge amounts of information and share that information among students. You can comb the entire contents of an encyclopedia, complete with graphics, cross-references, and a search engine, with an SD card encyclopedia.

With a Palm handheld, a student, teacher or administrator can do amazing things: take notes, calculate, sketch ideas, collect data, access resources, manage activities and, with the right hardware, access the Internet wirelessly.

Featured Palm™ handheld computers

Palm Zire™ 71 Handheld

Outstanding color, available software to support virtually any curriculum area and the ability to capture pictures with a unique built-in digital camera make the Zire 71 handheld the perfect educational tool. Watch video clips¹, listen to audio books and MP3s², or get organized with built-in personal information management software.

- 1 QuickTime required. Free Internet download available.
2 Expansion card required, sold separately.

Palm Tungsten™ E Handheld

Sleek and capable, the Tungsten E comes packed with the tools busy students and teachers need. Create and edit Word, Excel and PowerPoint¹ compatible files, synchronize with school calendars, take notes, send email², watch video clips³, and view photos. The powerful processor and 32MB⁴ of RAM provide plenty of room for additional applications and lots of content.

- 1 Windows only.
2 Requires an ISP, sold separately.
3 QuickTime required. Free Internet download available.
4 28.3MB actual storage capacity.
2 May require additional software.
3 Requires compatible mobile phone and ISP, both sold separately.
